Pupil Free Day

Thursday 14 December

From the Principal

Hello Friends

Well, here we are at the end of the first semester of the school year. Our school term finishes at 3.10pm Friday 7 July. I wish our families and community members a safe and relaxing holiday break.

Lost Property

There are just a few items of lost property on display for collection on a table outside the drink fountain area. Please check this table for any items that have been misplaced during the school term.

Pupil Free Day – 24 July

I remind families that students return to school on 25 July and our staff return to school on 24 July for Professional Development opportunities.

School Board Talk - June Meeting

On behalf of the school board and the school community, I wish to thank Damien Partridge for his many years of service to the School Board and to the school community. Thank you Damien, for your support of our school.

"If you want to change attitudes, start with a change in behaviour".

William Glasser

Thanks and blessings

Matt Perry

APRIM News

Last week as a community we spent a week looking at our Wellbeing. We spent time being creative, talking about how we look after our wellbeing and engaged in activities to develop our understanding of what wellbeing is.

Wellbeing is important for all and in recent years its value has been realised. To have a feeling of self-worth is key to our wellbeing . God gives us this value in many ways. This piece of scripture calls to us.

Arise, shine, for your light has come, and the glory of the Lord rises upon you.

Isaiah 60:1

God is a constant source of our worth and our value. Being able to see the worth of others is a beautiful gift, being able to see the worth of others and to nourish them is an even greater gift. Being recognised by others feeds our self-worth each time someone takes time to notice it in us.

One of the activities during last week was completed by the Year 4 class. They discussed how the adults in our school support the students wellbeing. They started with the obvious- 'My teacher looks after me', 'My teacher teaches me new stuff' etc. However, they drilled down to the many things that take place in our school that supports their wellbeing. Gradually the discussion moved around to – having a full sandpit to play in gives me a time to be happy, having climbing trees makes me feel free, a library full of books to read, having someone who looks after me when I'm sick or frightened makes me feel safe, paying the bills so we have an air conditioner and clean water to drink helps us to be healthy. The students came up with something that every adult in our school does to maintain their wellbeing. The students decorated a hand for each staff member and presented it during the week. The staff all had wide smiles and where touched, even better to see was the look of joy on the Year 4 student's faces as they realised how they had built up the wellbeing of a grown up.

Wellbeing week was a wonderful time for personal growth in some obvious ways but more importantly in the lifelong learning of us all involved.

Vinnies Winter Appeal

The reasons to donate are all around us. With your support, Vinnies can provide much-needed assistance to the people in our community that need it most. Together, we can do something about it, and the school holidays are a great time for a sort out. Each family received a bag to use to gather items no longer needed by the family. The donated items will go straight to Vinnies for sorting and distribution. This year Vinnie's needs **clean, good condition clothing**. However, Vinnies never refuses donations of warm blankets, coats, sleeping bags or adult clothing if you have some to donate.

Please return the bag after the school holidays. We will deliver the bags to Vinnies 31st July.

Community Mass - Friday 7th July 9am

Fr Michael and the Yr2 class will lead us in our community mass. All members of the community, extended family and friends are invited to our parish mass each 1st Friday of the month

Assistant Principal – Religious Identity and Mission

Library News

Premiers Reading Challenge closes this Friday

All forms need to have been submitted by this Friday. The tub in the classroom is the best place to deposit forms to make sure they are submitted on time. A special Presentation Assembly is held in Term 4 for all medal and certificate recipients. A date and time will be advertised in Term 4.

Holdfast Bay Holiday Activities

The Holdfast Bay is offering a wide variety of activities during the upcoming holidays.

- Techttime for kids
- Silly Songs and Magic Fun
- Teddy Bear Hospital
- Lego Play
- Guide Dog talk
- Make your own Mini Terrarium.

Booking and more info at the following link.

<https://www.holdfast.sa.gov.au/discover-our-place/whats-on?display=list&topic=play-at-the-bay&audience=&when=&from=&to=&venues=&keywords=>

Adelaide Planetarium Holiday Program

The Adelaide Planetarium at Mawson Lakes runs some truly mind-expanding events. These events sell out quickly but many are still available as we print the newsletter. Ages are catered from 5-18 with the majority for upper primary students. The link below will lead you to more info and booking details.

<https://www.unisa.edu.au/connect/galleries-museums-and-centres/adelaide-planetarium/explore/school-holiday-programs/>

Teacher/Librarian

Curriculum Corner

Long Service Leave

I will be taking long service leave from week 1 – 4 in Term 3. If you require any support with learning or inclusive education matters, please see your child's class teacher or a member of the leadership team.

NAPLAN results

It is anticipated that Individual Student Reports will be delivered to schools from week 1 of Term 3. As soon as these reports are delivered to us we will send a copy home to parents.

Parent Library

The Parent Library in the front office is continually having new resources/books added for parents to borrow. If you currently have a book from the library can you please return it by the end of term so that the resources can be sorted.

Maths Focus at CTK

This term we have been working with educational consultant Anne Bayetto who is guiding us through a whole school analysis of our student's Number knowledge in Maths. We have completed initial screening and have a daily focus in all year levels on spending 5-10min a day further developing every student's number knowledge. This includes estimation activities, number talks, picture prompts, place value tasks and dice activities. These focuses work alongside our everyday Maths lessons and will support students to develop greater automaticity when working with number facts.

The holidays is a great time to do some further practice at home. Activities include –

- Estimating amounts – jars of items, groups of things
- Dice games – counting on, counting backwards, number patterns, numbers before and after
- Comparing numbers and rounding up and down
- Using playing cards – sequence, create numbers, adding numbers
- See more activities below.

| Millions | Hundred Thousands | Ten Thousands | Thousands | Hundreds | Tens | Ones |
|----------|-------------------|---------------|-----------|----------|------|------|
| | | | | | | |

Wishing you all a wonderful holiday break.

Emma Heinrich

Leader of Learning and Inclusion

Number Activities

#1 Foundation Year

The Australian National Curriculum Says:
Establish understanding of the language and processes of counting by naming numbers in sequences, initially to and from 20, moving from any starting point.

What this means

- Count to 20; 0, 1, 2... 20
- Start at a different number: 7, 8, 9... 20
- Count back from any number: 11, 10, 9 ... 0

Activity Idea
Use a Number Board* and have your child write in the numbers 0 to 20, checking as they go.

*paper version can be downloaded at drpaulswan.com.au

#3 Year One (Number)

The Australian National Curriculum Says:
Count collections to 100 by partitioning numbers using place value.

What this means
Links with Card #2. When children count larger numbers in ones they often lose track. One way to overcome this is to group every set of ten. Collections: counting physical materials, not just reciting abstract words.

Activity Idea
Pour a large number of sticks / blocks / buttons etc. onto the floor and ask them to count. Repeat. Help the child realise it is easier to group into tens.

Teaching at Home - Parent Guide www.drpaulswan.com.au

#2 Year Two (Number)

The Australian National Curriculum Says:
Recognise, model, represent and order numbers to at least 1000

What this means

- The child can read three-digit numbers in numerals (e.g. 642) and translate them to words ("six hundred and forty two") and vice versa.
- This does not mean doing calculations with three digit numbers.

Activity Idea
Write three-digit numbers on sticky notes and have the child arrange them in order.

Teaching at Home - Parent Guide www.drpaulswan.com.au

#9 Year Three (Number)

The Australian National Curriculum Says:
Represent money values in multiple ways and count the change required for simple transactions to the nearest five cents

What this means

- 50c and \$0.50 are equivalent.
-  and  are the same, etc.
- Student can give change. e.g. a \$1.70 item, \$2 tendered, student may count back a 10c and say "one dollar eighty" and 20c saying "two dollars."

Activity Idea
Play shops, using method above. Use catalogues.

Teaching at Home - Quick Guide www.drpaulswan.com.au

#13 Year Four (Number)

The Australian National Curriculum Says:
Find unknown quantities in number sentences involving addition and subtraction and identify equivalent number sentences involving addition and subtraction

What this means

- These are early forms of algebra. Boxes, lines, ? marks and later letters may be used to represent missing elements of a number sentence.

Activity Idea
 $23 + \square = 20 + 8$
 $27 + 6 = 40 - ?$
 $2734 = 2000 + \square + 70 + 4$ *Create more of your own*

Teaching at Home - Quick Guide www.drpaulswan.com.au

#2 Year Five (Number)

The Australian National Curriculum Says:
Use estimating and rounding to check the reasonableness of answers to calculations

What this means

- When doing any calculation, the child should estimate what the answer will look like. So, if they are using a calculator to work out, e.g. 28×42 , it will be about 30×40 which is 1200.

Activity Idea
Ask them to estimate answers such as the above calculation 28×42 .

Teaching at Home - Quick Guide www.drpaulswan.com.au

#11 Year Six (Number)

The Australian National Curriculum Says:
Investigate and calculate percentage discounts of 10%, 25% and 50% on sale items, with and without digital technologies.

What this means

- For example: 10% of \$200 is \$20, the discount is \$20, the amount paid would be \$180.
- This is an application of Card #6, Fractions of a Quantity and related to Card #10.

Activity Idea
Calculate the percentage discount used in shopping catalogues.

Teaching at Home - Quick Guide www.drpaulswan.com.au

Year 4 - Mr Fiebiger

As part of our “Creating Communities” Art learning this semester, the Year 4 class watched a video of two artists who asked a variety of people to design and create their future home out of cardboard. Hundreds of these houses were then put together to create villages which went on display.

We worked in small groups to design our own houses and buildings in order to create our own Year 4 village. We worked together to combine our finished products into our village which we displayed in our classroom for school tour visitors to see.

Piano Lessons

by Nilanka Athukorala

Dear Families

An exciting new opportunity for piano tuition!

Introducing Nilanka Athukorala who will offer excellent one to one piano tuition for our students during school hours.

Nilanka has an incredible wealth of teaching knowledge and experience from schools and colleges in the UK and Sri Lanka, where she has been both a piano teacher and an examiner. Nilanka will offer piano tuition and AMEB exam preparations for students at Christ the King.

Please either pick up an expression of interest form from the front office or contact Nilanka (Nicky) using below.
